

Bank Management System

Overview

The **Bank Management System** is a Java console-based application that allows users to perform basic banking operations. It is designed to demonstrate core Java concepts such as Object-Oriented Programming (OOP), classes, objects, methods, and user interaction.

Features

- Create a bank account
- View account details
- Deposit money
- Withdraw money
- Display current balance
- Simple and user-friendly console interface

Technologies Used

- Java
- Object-Oriented Programming (OOP)

Project Structure

```
Bank Management System/  
├── BankAccount.java  
├── BankManagementSystem.java  
└── README.md
```

How to Run

1. Clone the repository:

```
git clone https://github.com/aefaz013/BankManagementSystem.git
```

1. Open the project in VS Code or any Java IDE.

2. Compile the program:

```
javac BankManagementSystem.java
```

1. Run the program:

```
java BankManagementSystem
```

Learning Objectives

This project was created to practice:

- Java programming
- Classes and Objects
- Encapsulation
- Methods
- User input handling
- Basic banking logic
